

ARTIS™

"Simply  
sophisticated."

Stunning performance.  
And more.

Siemens Hearing Instruments  
*Better hearing is better living.*

**SIEMENS**

Let  
**ARTIS**  
take you to a  
higher level.

ARTIS™ represents a true breakthrough in hearing instrument design. It offers you more advanced features than any hearing instrument in its class, for a higher level of comfort, reliability, and performance.

# ARTIS.

## Simply sophisticated.

### Innovative technology for outstanding performance.

ARTIS was designed with an advanced level of technology usually found only in higher-end hearing instruments. Its long list of innovative features includes a 12-channel digital noise management and speech enhancement system that reduces annoying background noises, like traffic and air conditioners, without compromising speech understanding. It also employs a sophisticated, high-speed phase cancellation feedback management system that helps minimize or eliminate feedback (whistling) while maximizing comfort. ARTIS even has a wind noise reduction feature on directional models to help optimize performance outdoors.

### A comfortable and convenient hearing experience.

ARTIS employs a TwinMic™ directional microphone system, available for most models, that is both automatic and adaptive. This leading-edge technology is clinically proven to improve speech understanding — especially in listening situations with variable background noises. ARTIS also has a convenient AutoPhone feature for most custom and BTE (Behind-the-Ear) models, that simplifies using the telephone. ARTIS even has alerting tones to remind you when it's time to change batteries.

**New nanocoated housings.** ARTIS BTE models feature new nanocoated housings that repel water, sweat, and dirt, for easy cleaning and enhanced reliability.

**The e2e wireless™ advantage.** ARTIS is also available with breakthrough e2e wireless (ear-to-ear) technology, which synchronizes two instruments to ensure the best possible localization and directivity. It also gives you convenient, one touch control of both instruments. Your Hearing Care Professional can tell you more about the many benefits of ARTIS with e2e.

### A style to fit every need.

ARTIS is available in a huge variety of styles, including custom, BTE and open fit designs to fit virtually any hearing need. And it comes in a broad selection of colors to blend with a wide range of skin tones.

**Open fit option.** For those who prefer an open fit instrument, Siemens offers ARTIS Life. It has no earhook or visible controls, just an ultra-thin tubing that delivers sound into the ear. It's virtually invisible when worn.

Why settle for less? Let ARTIS take you to a higher level of comfort, convenience, and performance.
